CITY OF DOWNEY

PRESS RELEASE

City Website Now Features Advanced Property Search Tool

The public may now access real estate property database directly through City website

Downey, CA, February 28, 2014: In an effort to continue to make information easily accessible to the public and encourage opportunities for business growth in Downey, the City has added an innovative and advanced property search tool to its website. Made available through the Gateway Cities Council of Governments (COG) website, this new property search tool provides extensive search capabilities for real estate in the City of Downey.

By visiting the City of Downey website at www.downeyca.org, and clicking on the "**Business Site Locator**" icon, residents and businesses can now obtain all of the information needed to ensure they find the right building, lot, or retail space for their business. The public may now view available properties in the region, search all available sites, obtain detailed property and business reports, conduct a thorough demographic analysis of the region, create and print maps specific to their needs, and much more.

"As set by my fellow Council colleagues and I, one of our City's main priorities is to promote efficiency and adaptability within our operations and as part of that, we are committed to employing technology to increase the accessibility of information. By adding this new feature to our website, we are not only making it easier for the public to obtain information first hand, but we are also making it easier for them to do business with us," said Mayor Fernando Vasquez.
